CARBON HOCKEY CLUB MEETING

Although the hockey season is still a couple of months away, the local boys are getting anxious and a re-organization meeting was held in the Builders' Hardware Store on Saturday evening, with a good representative crowd present.

S. J. Garrett was elected president, and Bruce Ramsay secretary, of the association.

The Club decided that if possible, they would take over the skating rink and operate it on the same basis as last year, thus assuring the skaters of some sport throughout the winter.

A committee was appointed to check over the requirements necessary to put the rink in shape for flooding, and also to see about the re-arranging of lights for hockey. It is the intention to clear the rink bed of weeds and do some levelling on the ground before freeze up. About nine new lights with large reflectors are also to be installed before the real winter, so that when cold weather sets in the hockey and skating season can get under way early in the season.

Prospects look bright for a good hockey season in Carbon and it is expected that a fairly good team can be assembled to represent the town this winter.

The Carbon Hockey Club, embodying junior and senior teams, is taking on quite a responsibility in operating the skating rink and with many necessary repairs the public support will be needed to carry on. When the season is at hand a drive will be made for ticket holders.

At this meeting it was also decided to put on a dance in the near future in order to raise funds. The date for this event has not yet been set.

The Saturday night dance question was also discussed and if suitable arrangements can be made an endeavor

MISCELLANEOUS SHOWER FOR CONSTANCE NEVILLE

Honoring Miss Constance Neville, a September bride elect, Mrs. Milton Hicks and Miss Peggy Grieve entertained at a miscellaneous shower at the home of the former, on Friday evening last. The gifts were presented by little Shirley Grieve, in a doll's bassinet, decorated in pink and white.

A dainty lunch was served by the hostess, assisted by Mrs. McClure, Mrs. Hawkins and Miss Doris Grieve. —Drumheller Review.

General Synod of Church England in Canada

The General Synod of the Church of England in Canada opens in Toronto on September 14th. During the session of Synod—which is the legislative body representative of the whole Canadian Church—a new Primate will be elected and also Bishops for the Missionary Dioceses of the Yukon and Athabasca. These have become vacant due to the translation of Bishop Stringer (formerly of the Yukon) to the Archbishopric of Rupert's Land, and the resignation of Bishop Robbins from Athabasca. The report of the Anglican National Commission—a committee which recently inquired into Anglican affairs throughout the Dominion—will be an important document laid before the Synod. The prayers of all Church people have been offered up for the guidance of the Holy Spirit upon the deliberations of the Synod for some time past; its pronouncements are anticipated with much interest, as they will undoubtedly bear directly upon many phases of Canadian life.

will be made to raise funds in this manner.

ALBERTA NEWS

Clareholm council has decided to continue the operation of the hospital there for another year, following October 15, when the present lease expires.

Business men of Turner Valley are beginning to lose heart, waiting for the conditions to improve, and a few changes are expected in the near future, according to the Tri-City Observer.

Kind hearted people in the Granum district have made an offer to collect a car load of wheat to be donated to the Red Cross, in lieu of cash, which is not available this season.

Word was received at Red Deer last Tuesday that James Hazlett, of the Balmoral district has been awarded the Alberta championship for 1931 for the best field of standing grain in the province-wide competition.

The ban on the Bow River forest reserve has been lifted, effective immediately. The reserve has been closed since August 21, owing to fire hazard, during the time of the disastrous Crow's Nest Pass fires.

While out shooting last week Ernie Wright of Strathmore accidentally shot himself in the leg with a 22 rifle. He was walking along carrying the gun, which was not in good shape being an old one, when it fired, and the bullet struck him just below the knee, stopping just above the ankle. —Strathmore Standard.

Herman Trelle, Canada's Wheat King will be an exhibitor in the competitive classes of the World's Grain Exhibition and Conference, to be held in Regina next year.

Headly Craig of Carstairs had a shipment of hogs that weighed 2210 lbs. for eleven animals, all of one litter, and five months old. They averaged over 200 lbs each.

Eight hundred and nine men and 37 women received work on Alberta farms through the Alberta employment service during the week ending Sept. 5.

The annual Labor Day Quilting and Athletic meet held by the Newcastle Quilting Club and Athletic Association on Monday, was a decided success.

Harvesting in the Gleichen district is making great progress and will be finished shortly.

REDUCTION IN EXPRESS CHARGES ANNOUNCED

To meet competition from automobile trucking companies, drastic rate cuts in many classes of shipments are being made by the Canadian National Express.

On specific commodities rates are reduced on shipments over 100 pounds, in most cases. In the general merchandise class, slashes are being made covering shipments of less than 100 pounds. Especially in agricultural produce grown and packed in Canada are rate cuts being made. In some cases the rates have been lowered by 33 1-3 per cent.

A schoolmaster once said to his pupils, to the boy who would make the best piece of composition in five minutes on "How to Overcome Habit" he would give a prize. When the five minutes had expired a lad of nine years stood up and said: "Well, sir, habit is hard to overcome. If you take off the first letter it does not change 'abit.' If you take off another letter you still have a 'bit' left. If you take off still another, the whole of 'it' remains. If you take off another it is not totally used up, all of which goes to show that if you want to get rid of habit you must throw it off altogether." Result—He won it.

HAVE YOU PAID YOUR SUBSCRIPTION YET? NOW IS THE TIME

CARBON SCHOOL FAIR

The Carbon school fair was held on Thursday last and exhibits from all parts of the district were noticeable. On the whole, the exhibits were better than last year although the quantity was not so noticeable, owing no doubt to the wet weather, which hindered many from getting to town, while others were busy with the harvest and could not be present. We will endeavor to publish a list of prize winners in this paper as soon as the list has been completed by the committee.

In some instances pupils did not follow the instructions regarding exhibits and although quality was there, the quantity was lacking. Where this occurred there were no first prizes given. Pupils are asked in future to follow the rules regarding all exhibits.

Bank of Montreal General Crop Report

Apart from the drought stricken areas of the Prairie Provinces, crops generally throughout the Dominion are fulfilling earlier promises of good yields of high quality. Harvesting in most districts is now well advanced and conditions continue favorable for late maturing crops of fruit and roots. With harvesting 65 per cent completed in Alberta, 75 per cent in Saskatchewan and 90 per cent in Manitoba, the estimated prairie wheat crop now stands at 250,000,000 bushels. In Quebec most crops are well up to average or above it, and conditions continue favorable. In Ontario cutting is under way of a heavy second crop of alfalfa of good quality, and an excellent crop of corn.

Alberta, Northeastern area—About 60 per cent of cutting is completed. Threshing has commenced and will be general next week. Estimated wheat yields are from 5 to 30 bushels.

Southeastern Alberta—Cutting is completed and 60 per cent of threshing. The average yield is seven bushels of good quality wheat.

Western Alberta—Threshing is general in the southern section, with wheat yields of from 6 to 25 bushels. About 50 per cent of cutting is completed in the northern and central sections where the crop generally is heavy and is later maturing. An average crop of sugar beets is expected.

THE TRANS-CANADA HIGHWAY

The route of the Alberta section of the proposed trans-Canada highway will be by way of Medicine Hat, Calgary and Banff, it was announced by Hon. O. L. McPherson, minister of public works.

Details remaining to be settled as to the ultimate standard to which the road will be brought, will be discussed with Dominion officials in the near future.

The minister of public works announced this week that as a result of discussions carried on during the last two weeks with the governments of the neighboring provinces of British Columbia and Saskatchewan, it was now possible definitely to announce the selection of the route of the trans-Canada highway and that Banff, Calgary-Medicine Hat highway had been selected as the Alberta location.

PRESBYTERY MEET AT THREE HILLS

The Presbytery of Three Hills met in the United Church, Three Hills, last Thursday afternoon. All the ministers were present with the exception of the Haskaw one, who sent regrets.

It being a busy time, only one elder was present in the afternoon, but in the evening a good number of representatives were present. Dr. Powell, superintendent, and Mr. Hibbert, representing his department, were also on hand. Rev. J.C. MacLennan, chairman, occupied the chair.

There was a large amount of business transacted. In the evening a large audience was present to take part in the induction of the new minister, Rev. C.R. Corcoran, late of Gleichen. Rev. W. H. Stratton preached a very interesting sermon on "Go Forward." Rev. C.B. Oakley addressed words of counsel to the congregation and Rev. Dr. Powell spoke to the minister. All these addresses were encouraging and helpful.

The choir of the church rendered the anthem, which was much appreciated, Mr. S.J. Robertson taking the solo part.

The ladies of the congregation provided a sumptuous repast in the basement at the close of the induction service.

The following officers have shown up for the meeting: —The Presbytery.

Chairman—Rev. J.C. MacLennan, of Acme.

Home Missions—W. McNichol, (convenor) Carbon, W.E. Sieber and Mrs. Ramsay.

Foreign Missions—W. H. Stratton (convenor) Delburne, Rev. S. Redberger and S. J. Robertson.

M. and M. Fund—C. B. Oakley (convenor) Elnora, W. H. Stratton and T. Wilton.

Religious Education—C. R. Corcoran (Convenor) Three Hills, R. Upton and Harold Burmington.

Social Service—F. J. Hartley (convenor) Trochu, R. Upton and J. C. McNair.

Treasurer of Superannuation—Rev. C.B. Oakley, Elnora.

Statistics—F. J. Hartley and C. R. Corcoran.

Settlement Committee—Wm. McNichol and J. C. MacLennan.

Secretary-Treasurer—Rev. F. J. Hartley, Trochu.

PASTOR ENTERS RED DEER FIGHT

Announcing that he will run on an independent platform, the Rev. Thos. M. Revie, for many years pastor of Red Deer Presbyterian Church, is the first candidate to enter the political arena for the Red Deer seat in the provincial legislature left vacant by the death of G. W. Smith.

Rev. Mr. Revie has resigned his pastorate in Red Deer and is now preparing to give all his time to the forthcoming battle. While his platform will be independent of all parties, it will embody many of the planks of the U.F.A. with whom Mr. Revie is prepared to co-operate as much as possible.

At the time of his resignation which took effect last week, Mr. Revie was chairman of the Red Deer Presbytery. He has taken a prominent part in the life of Red Deer for the past five years.

Alberta Pool Elevators Under Public License

Alberta Pool Elevators are now operating under public license.

This permits the Pool Elevators to buy or handle any grain. Pool Elevator facilities are not restricted to the handling of Pool members' grain only.

The reputation for fairness gained by Pool Elevators should be an inducement for all growers to patronize these elevators.

Any person delivering grain to Pool Elevators may sell his grain in any way he selects and at any time desired.

'Fresh from the gardens'

Courtesy and Safety

"Why is it," remarked the Observant Man, "that a man, who may accidentally jostle you in a crowd, turns and says 'I'm sorry,' or 'I beg your pardon,' but who, when he gets behind the steering wheel of a motor car, throws all ideas of courtesy to the winds and acts as if you had no rights whatever, even the right to live?"

It is the unsolved puzzle of this present age. A man ordinarily polite and courteous, who, if he bumped into another couple when dancing, or stepped on his partner's toes, would express his regrets, when engaged in motoring act, all too frequently, like an ignorant, uncouth boor. He who would hesitate to steal so much as a lead pencil from another, thinks nothing at all of stealing the right-of-way at a road intersection, even from a lady, considers he has done something smart, and even derides or joshes those whom he has made his victim. Yet he is guilty of theft, not only in a moral sense but actually in a legal sense, because the law declares it an offence to take the right-of-way from another to whom it belongs.

Many a motorist, who, if standing on his own two legs on the shore of a lake would never entertain the thought of pushing a non-swimmer into deep water at the peril of his life, nevertheless does not hesitate to crowd a fellow motorist, possibly a beginner in the art of driving, off the road at the risk of smashing the other's car and possibly seriously injuring or killing him.

And why is it that so many men, ordinarily polite and courteous, refined in language and manners, become abusive, profane and quarrelsome over some slight mishap on the road? What is it about a motor car, or the pleasure or business of motoring, that so completely changes many men, and women, their usual tenets of conduct into the most disagreeable creature and regardless of the rights, comfort and safety of others?

Is it merely because the modern motor engenders such speed that the drivers of cars become reckless, heedless, and for the time being at least are no longer normal human beings? Or is it that peculiar quirk in our human makeup that seems to impel us to do what both commonsense and the law says we are not to do?

The conduct of not a few, but countless thousands of motorists is an unsolved mystery. No man, except he be a maniac, would think of throwing vitrol into another's face and thereby blinding him, but to anyone used to travelling our highways at night it would seem that the vast majority of motor car drivers think nothing at all of driving past approaching cars with powerful, glaring headlights completely blinding for the time being the drivers of those other cars, and inviting terrible disaster. Is it that they are just too lazy to be even bothered to dim their own lights for a few seconds? Or is it something else, some petty meanness of disposition, some un-understandable twist in their character which does not at other times display itself?

And yet courtesy is such a fine trait, a simple thing, something that costs nothing, but which is the hallmark of the true gentleman.

And how much pleasure it would add to motoring if courtesy, instead of a rude boorishness, became the universal habit of the road! And, oh, how much it would add to the safety of the road!

Governments provide rules and regulations governing the condition of cars; Automobile clubs and associations conduct campaigns of education; tests are provided for brakes, lamps, tires, steering gear, etc., and all serve very useful purposes. But a uniform, universal recognition and acceptance of the ordinary rules of courtesy by one toward another, and by each toward all, would do more than any one thing to obviate accidents with their present appalling bills for damages and irreparable loss of life.

As a nation we are striving with might and main and the expenditure of fabulous sums of money to combat tuberculosis, cancer, and dread diseases of one kind and another; we are engaged in conservation of our forests, our streams and water-powers, our fisheries, our minerals; we spend millions on research work to combat rust in wheat, grasshoppers, and other pests which destroy the proceeds of our agricultural labours,—yet we go blithely on taking human life recklessly, needlessly, maiming many more, and destroying millions of dollars worth of property annually through the agency of the automobile, which to many has become a dread and a menace when it ought to be a joy and a blessing.

And such a little thing, such a simple thing, as the practice of a uniform courtesy would serve to revolutionize the situation for the better. Why not try it for a change! Let a little courtesy do its good work.

Barred From U.S.

William Shier, 48, who was returning to his home in Gary, Ind., after being two weeks at the bedside of his mother in Newmarket, Ont., has been refused re-entry into United States by United States immigration authorities. It is alleged that he entered United States illegally seven years ago at Portal, N.D.

A newspaper man's son says that editors call themselves "we" so that the man who doesn't like the article will think there are too many people for him to tackle.

Douglas' Egyptian Liniment is an excellent leg wash for stock. Also removes corns in horses and quickly relieves bruises, sprains, swellings and joint stiffness.

Has Tame Butter Flies

A Philadelphian has developed what is said to be one of the finest collections of live butterflies in the United States. For many years Daniel G. V. Laning has made a study of the beautifully coloured insects, raised them and tamed them. Now, he says, they will alight on his paper while he is reading and not move until he is ready to turn a page.

The Mother of Seven Children Used It for Diarrhoea

Mrs. Ray Drinkwater, R.R. No. 2, Hagersville, Ont., writes:—"I am the mother of seven children, and last summer one of them, 17 months old, was taken very sick with diarrhoea, and I thought she was going to die."

"My husband went 7 miles to see what my sister had given her baby, and he came home with a bottle of Dr. Fowler's Extract of Wild Strawberry. I gave the child a few doses and she was soon well again."

"My other children also had diarrhoea at that time and I gave them 'Dr. Fowler's' with the same results."

Japan's Population

Is Increasing By Nearly a Million Every Year

One or two competent writers on Japan having announced lately, with some confidence, that the population question in the Japanese Empire would settle itself because the rate of increase was steadily slowing down, the figures of the 1931 census now emerge to shatter that comfortable doctrine. The birthrate in Japan is not going down, it is going up. And the population is increasing at present by nearly a million every year. That fact may not be as disturbing to the rest of the world as it sounds. The Japanese, for all their apparent need for emigration grounds, still show little desire to emigrate on any considerable scale. But the alternative is to convert Japan systematically from an agricultural into an industrial State.

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-spotted."

"I was heartsick until the happy thought struck me to dye them. I just dyed them a deeper green, and as I used Diamond Dyes they look gorgeous and new. I have never seen easier dyes to use than Diamond Dyes. They give the most beautiful colours—when used either for tinting or dyeing—and never take the life out of cloth as other dyes do."

Mrs. J.F.T., Montreal.

Preparing Relief Camps

Ontario Government Getting Plans In Shape For Unemployed

Payment of 30 cents an hour for an eight-hour day, with a deduction of 80 cents a day for board and 50 cents a month for medical services will be made to men employed in the relief camps being established in northern Ontario by the provincial government for the construction of the Trans-Canada Highway.

Official details of the administration of the camps were issued by Hon. William Finlayson, Minister of Lands and Forests. Present plans are to get the camps into operation early in October.

There will be no military methods but provincial police will be available whenever required at the camps.

Persian Balm invests every woman with subtle charm. Delicately fragrant. Cooling and healing. Disperses all roughness or chafing. Makes skins delightfully soft-textured. Every woman should use this peerless toilet requisite. Daintiness—beauty—refinement—Persian Balm achieves these in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm unhesitatingly choose Persian Balm.

Many Years a Sailor

Earl Jellicoe Held Position Of Junior Officer In 1893

It seems ages ago in this whirling world since the disastrous collision in the Mediterranean between the "Victoria," flagship of the fleet, and the "Camperdown," and it is almost startling to recall that Earl Jellicoe, Canada's distinguished visitor, was a junior officer on the ill-fated "Victoria." Though stricken at the time with fever, he plunged into the sea and was among those rescued—in his case to give further distinguished service on another flagship of the fleet. Earl Jellicoe took to the sea when young, as the "Victoria" went down in June, 1893; and he is far from being an old man.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the succor it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

High Quality Canadian Cattle Shipments of Canadian cattle to Great Britain have proven at times of such a high quality that the livestock sold on a par with Scottish home-killed beef according to John Byers, secretary of the council of Western Beef Producers. The Canadian cattle he added, at some periods, had been sold in preference to the Irish importations.

Bronze Statue Honours Hardy

Unveiled By Sir James Barrie At
Dorchester, England

Unveiling a lifesize bronze statue of Thomas Hardy, the work of Eric Kennington, here in Hardy's native Dorchester, Sir James Barrie, creator of "Peter Pan," told how nearly the world came to missing altogether the late novelist's services.

"When the child Hardy was born," said Sir James, "the doctor thought him dead and dropped him into a basket. But a woman stepped forward to make sure and found he was alive. A statue to this woman—Mr. Kennington could have done worse than give us that."

It is usually safe to say that when a child is pale, sickly, peevish and restless, the cause is worms. These parasites range the stomach and intestines, causing serious disorders of the digestion and preventing the infant from deriving sustenance from food. Miller's Worm powders, by destroying the worms, correct these faults of the digestion and serve to restore the organs to healthy action.

Woman Wins Air Derby

Aviatrix From Memphis, Tenn., Carries Off All Honours

Mrs. Phoebe Omlie, of Memphis, Tenn., was officially announced as the winner of the transcontinental handicap derby from Santa Monica, Cal., after she had taken a large share of the honours at the national air races.

The contest committee announced that Mrs. Omlie had won the handicap race, in which 50 or more women and men competed, with a rating of 109.19 points. She won the grand prize as well as the prize for the women's division. D. C. Warren, of Alameda, Cal., won the men's division of the race with 103.5 points.

White was the colour of royalty during some stages of Egypt's ancient history.

Co-Operative Wool

Manitoba and Saskatchewan Shipments Reach High Figures

The Canadian Co-Operative Wool Growers, western branch, report the receipt during July of 552 lots of wool at Regina, and of 502 lots at Portage la Prairie; the total Manitoba receipts amount to 200,624 pounds, and Saskatchewan receipts about 333,000 pounds. Up to the end of July eleven cars have been shipped from Regina, seven from Portage la Prairie and one from Marchand. During the month four contracts were received from Manitoba sheepmen, covering 130 fleeces and thirteen contracts from Saskatchewan sheepmen covering 984 fleeces.

Bears Killing Alberta Cattle

Right to shoot bears in Waterton Lakes National Park, in southwestern Alberta, was sought by ranchers of the district. Cattle on ranches in the territory have been killed and carried within the park confines before ranchers were able to defend their cattle.

No Longer

Bilious—Thanks

The Great Importance Of Experimental Farm Work In Fibre Crop Production In Canada

It would be very difficult to estimate in dollars and cents the value of the work done in Canada by the fibre crops division, which operates under the direction of the Dominion Experiment Farms System. The Division of Economic Fibre Production embraces work in a relatively large and varied field of endeavour and it is almost as directly connected with manufacturing activities as with cultural conditions.

There are some twenty projects under way at Ottawa in connection with problems that have confronted flax and hemp growers at various times. It is important to have an accurate record of the varieties best suited to the cultural and climatic conditions of Canada, and these records become more valuable as additional information is revealed from year to year.

The application of fertilizers best suited to these fibre plants offers a great field for careful investigation. This work is being carried on systematically at Ottawa as well as at a number of the branch farms extending from British Columbia to Nova Scotia, so that results may be analyzed, compared and recorded for future reference.

The central experimental farm at Ottawa is equipped with a modern flax mill in which flax and hemp preparing machinery of all kinds are given rigid tests. The farmer benefits from such a service because he knows that if the machinery he is interested in is given an unbiased and thorough test under government supervision, he will receive reliable information concerning it.

Then too, the fibre division of the central experimental farms system renders an extremely important marketing service.

During the year 1930 flax growing in eastern Canada received \$5.50 a bushel c.i.f. Belfast, Ireland for a special variety of flax seed known as J.W.S. This variety was originated by an Irishman named John W. Stewart, and was sent to Canada in 1928-29 for a test propagation by the Ministry of Agriculture for northern Ireland. During the year 1930-31 the price received for this special pedigree flax seed was \$4.68 per bushel. The business end of these transactions was handled by the fibre division through the Ministry of Agriculture, northern Ireland and the seed was cleaned for the farmers and inspected free of charge by the Canadian Government.

W. J. Megaw of the Ministry of Agriculture for northern Ireland stated in a letter received by the fibre division on the 20th of May, 1931, that "in counties Antrim and Derry the demand was largely for Canadian J.W.S."

This report is particularly gratifying in view of the fact that more than Canadian interests are bargaining for this market in Ireland.

During this past year farmers in the districts of Rhein, Saskatchewan, and Portage la Prairie, Manitoba, were given assistance in the handling of their respective hemp crops. This service was rendered in order to stimulate and encourage the establishment of a cordage industry in the west.

Also, this past year, a specialist was sent from Ottawa to British Columbia to carry on extensive experiments in the growing and handling of flax for fibre purposes. The results showed that British Columbia can produce a quality of fibre that com-

pare very favourably with the best grades of Irish flax fibre.

Another service which has received favourable commendation is the installation of small demonstration flax mills in certain flax growing districts. These mills are equipped with a flax breaking machine and three or four scutening blades, as the case may be. The government supplies the machinery and the interested parties supply the accommodation and the power to run the machinery.

Hundreds of samples of the best fibre flax seed are mailed free of charge to farmers each year and applications for these samples is made to the fibre division from all parts of Canada.

When these facts have been duly considered one realizes the real value of experimental farms work in fibre crop production in Canada.

Ocean Travel De Luxe

All-Electric Kitchen Will Provide 12,000 Meals a Day On New Cunarder

A wonderful all-electric kitchen, which will provide 12,000 meals a day, is being planned by the catering experts of the Cunard Line for the new 73,000-ton liner now being built at Clydebank.

The liner will carry over 3,000 passengers and 500 crew, and for the big task of feeding them 100 highly-paid chefs will be employed in the all-electric kitchen. The kitchen has many novel devices, including machines for keeping the ovens and grills at certain temperatures and instruments which wash thousands of plates and dishes in a few minutes. It will also be possible to cook simple dishes without attention.

The wine experts of the company have evolved new methods to ensure that all wines will be kept in perfect condition even though the liner may be running through heavy weather. Wines are purchased five years before they are used in Atlantic liners, and for years now the wines for the new Cunarder's cellar have been waiting for the maiden voyage. The cellar will be one of the largest and best in the world.

Great progress is being made in the construction of the Cunarder, the castings for the gear wheels and turbines, and the stern bracket, one of the largest ever made, are nearing completion at Darlington and Sheffield. Half the boiler installation is complete, and 1,000 miles of electric cable are ready for installation.

Industrial Moose Jaw

Moose Jaw now has an industrial area of about 50 city blocks, the city council having set aside three subdivisions for the purpose—Prairie Heights, Westmore and Sunnyside. The area lies roughly between the main line of the Canadian Pacific and the Outlook line branch.

Tin exposed to extreme cold may crumble to dust.

Bonds Of Empire

Earl Jellicoe Refers To Important Part Played By Canada

Great Britain is looking to Canada to provide a lead in strengthening the British Empire, declared Earl Jellicoe, president of the British Empire Service League, addressing an Empire Club luncheon at Toronto. Coupled with this remark was his confident assurance that Britain would surmount present difficulties and emerge successfully from the national crisis.

The Admiral of the Fleet recalled feeling which existed in the Dominion in the '90's that Canada should separate from the Empire and throw in her lot with the United States. The Canada of today was sufficient answer to the fear that such feeling might ever lead to action.

The observation of Empire Day in Canada had developed from that feeling, he said. "It is well that our children should realize the common loyalty which binds the Empire; the tie of blood and the tie of respect and honor which we give to our king."

"Canada has played an immense part in the empire's work; Canada has fought in the common cause, and I have no doubt she would do it again."

We of the Mother Country will look to Canada to give us a lead in the strengthening of the ties of Empire."

How To Keep Milk

Keeping Milk In Proper Condition For Home Use

Four little words tell the whole story about how to keep milk in proper shape for use in the home. These are "Clean, Cool, and Covered." This is one of the fundamental rules of home economics to which the Dairy and Cold Storage Branch calls special attention. For best results milk should be served at the end of the meal, and it should always be sipped slowly. Milk is the ideal food for children of all ages because of its high quality and quantity of protein, its abundance of calcium, its readily assimilable phosphorous content, its iron and its easily digested fat and sugar.

Radium Not Cure-All

But Has Accomplished Much In Treatment Of Cancer

Cancer control was the greatest problem of health today, and radium had come to the fore as a potent agent. It was not a panacea, for even in skilled hands its results were often disappointing, but, on the whole, the world of medicine could look with satisfaction upon what it had already accomplished. Dr. Joseph Muir, famed New York cancer expert and physical therapist, stated in addressing the convention of the American Academy of Physical Therapy, held at Montreal.

Southern Alberta Wool

Shipments of wool from Southern Alberta to the Canadian Co-Operative Wool Growers' warehouse at Weston, Ont., have broken all records, according to a report issued by N. T. Macleod, secretary of the Southern Alberta Sheep Breeders' Association. Deliveries made to date aggregate 1,800,000 pounds, the wool clip being unusually heavy this year.

Growing Habit Of Buying Empire Goods Gains Impetus In The United Kingdom

Wilkins' Trip Important

Only Way Certain Scientific Phenomena Can Be Obtained

Star dust on the bottom of the sea, among other scientific things, has drawn Sir Hubert Wilkins, submarine polar explorer, into great danger, in the opinion of Vilhjalmar Stefansson, who once led Sir Hubert on another polar trip.

Infrequently heard from, Sir Hubert is now in the great Arctic ice pack about 350 miles from the north pole, Mr. Stefansson said. "Sir Hubert undoubtedly cannot much longer delay his return from the ice because the summer season virtually is finished."

Mr. Stefansson emphasized the importance of Sir Hubert's trip explaining that in no other way can certain important scientific phenomena be obtained.

"Star dust is probably the most romantic of these phenomena. Scientists hold that dust from outer space is deposited in the polar regions in comparative purity, whereas in other parts of the world it is mixed with terrestrial dust. Obviously any samples that Sir Hubert can obtain from the bottom of the sea will be of use to science."

"Sir Hubert also seeks to weigh the earth from the north which is the shortest radius to the centre of the earth. The earth already has been weighed from the equator, where the radius is longest, and a comparison of the two weights will disclose important phenomena about, among other things, the mineral constitution of the earth."

"By use of the Sonic depth finder, Sir Hubert can make an almost unbroken contour map of the bottom of the Arctic sea. Sir Hubert also can observe water life in the Arctic sea as no other explorer could—by actually being under the surface where the life exists. He also can make important weather observations, investigate water temperatures and otherwise fill in the innumerable gaps that exist in our Arctic information."

"Probably three years will be needed for the completion of the work of the expedition."

Manitoba Wheat

Test Shows High Protein Content This Year

Dr. F. J. Birchard of the research laboratory of the Canadian Board of Grain Commissioners, in a test made for protein content in the wheat crop of Manitoba, shows that the wheat crop of the province has a maximum of 18.3 per cent, as against a maximum of 14.5 per cent, last year and a minimum of 10.2 per cent, this year as compared with 8.4 per cent, last; the average being 12.25 per cent, against 11.5 per cent, in 1930. The test grains were taken from the same districts as last year.

Time cannot remove kindly acts from a grateful heart.

"The growing habit of buying from within the Empire has attained an impetus in the United Kingdom," states the report of the Empire Marketing Board just published, "which even the world-wide economic depression has been powerless to retard."

The report for 1929-1930 shows that twenty-five new records had been set up, in the year under review, by Empire foodstuffs, as regards volume of imports into the United Kingdom. Apples from Canada and from New Zealand reached record quantities in 1930, as did bananas from the British West Indies, butter and cheese from New Zealand, coffee from British East Africa, currants from Australia, eggs from Australia and South Africa, grapefruit from South Africa and Palestine, lamb from New Zealand, oranges, peaches, plums, sugar and wine from South Africa, pears from four Dominions, and tobacco from India.

A number of other foodstuffs are mentioned which surpassed all previous years, except 1929. These include Australian raisins and sultanas, New Zealand frozen pork, Ceylon tea, Australian sugar, and British Malay-canned pineapples.

The people of the United Kingdom are reported to be buying steadily more and more from within the Empire. Many factors have combined to bring about this result. First, more attention is being paid today by Empire producers to the need for grading and orderly marketing. Secondly, distributive traders have shown themselves resolved to further the progress of Empire buying on sound economic lines. Thirdly, the contact between producers overseas and wholesale and retail traders in the United Kingdom is growing closer. Fourthly, consumers in the United Kingdom are becoming more aware of the excellence and wide range of Empire products.

Since the report was issued the imports of Canadian cattle on the hoof, both for further feeding and for slaughter at port have been resumed on a considerable scale and it is possible, if the hog runs this fall justify it, that Canadian bacon imports into Great Britain will increase before the end of 1931.

Grain Grades High

Exceptionally High Quality Of This Year's Crop Is Noted

"Grain which has passed through the inspection department at Winnipeg in the last few days is of exceptionally high quality," it was stated by J. D. Fraser, chief grain inspector at Winnipeg, in a recent address before the officials of the World's Grain Exhibition and Conference at Regina. "A considerable amount has graded No. 1 hard; a great deal has gone No. 1 Northern, and some has graded No. 2 Northern on account of mixtures of durum and barley."

Ship Horses To Montana

During a recent week sixteen carloads of horses, rounded up in the Medicine Hat district, were shipped to the Montana Horse Products Company at Butte. Mr. Chipman, who is buying for the Butte concern, was unable to estimate the coming requirements of his firm from Canadian territory, but the demand may run to 20,000 head.

Education is first aid to finding out how little you really know.

Director (to chauffeur): "Why did Mr. Brown dismiss you after so many years' service?"
Chauffeur: "I had to drive his mother-in-law to the station and I arrived two minutes late."—En Rolig Half Timma, Götterburg.

LONGEST SINGLE SPAN BRIDGE IN THE WORLD

Here's a striking aerial view of the Sydney, Australia, harbour bridge, which has been seven years in construction, at a cost of nearly \$40,000,000. As the longest single span bridge in the world, it will carry four lines of vehicular traffic, two electric train tracks and two street car tracks, as well as two foot-bridges for pedestrians only. One million passengers will cross the bridge daily, it is estimated.

"Good morning, is your mistress at home?"
"No. I'm sorry, this is her day out."—Hummel, Hamburg.

PUT HIM OFF HIS PIPE

Indigestion and Acidity

"A few months ago, I had an attack of indigestion, heartburn and acidity, and had no appetite for meals, especially breakfast. I am a pipe smoker, and for several days I felt so ill I could not even look at my pipe. I decided to try Kruschen Salts. A few days afterwards I found that the heartburn and acidity had gone, and for the last five or six weeks I have been in my usual good health. I can now enjoy my pipe-smoking, and in fact feel about 10 years younger."—R. P.

When your digestive juices fail to flow freely your food lies in the system and ferments, thus causing the distress of indigestion. The "little daily dose" of Kruschen first stimulates the flow of the gastric juices, and then ensures complete, regular and unailing elimination of all waste matter every day.

SUNDAY SCHOOL LESSON

SEPTEMBER 20

THE COUNCIL IN JERUSALEM

Golden Text: "For ye, brethren, were called for freedom; only use not your freedom for an occasion to the flesh, but through love be servants one to another."—Galatians 5:13.

Lesson: Acts 15:1-35; Galatians 2.

Devotional Reading: Romans 8:1-10.

Explanations and Comments

A Deputation Sent From Jerusalem to the Church at Antioch, Acts 15:22.—When certain men came from Judea and taught the brethren at Antioch that they could not be saved unless circumcised after the manner of Moses, it became evident that the whole question of Gentile Christianity must be settled once for all and settled speedily.

The Church appointed Paul and Barnabas and others (among them Titus, Galatians 2:1), to go to Jerusalem and work out the problem in consultation with the apostles and elders. Read the first twenty-one verses of our chapter. The Council selected two of its outstanding men, Judas and Silas, to return with Paul and Barnabas and deliver its decision to the church at Antioch. "Judas called Barsabbas" may have been brother to "Joseph called Barsabbas," candidate with Mathias as successor to Judas Iscariot (Acts 1:23). Silas became Paul's companion on his Second Missionary Journey, and in the next three chapters of the Acts he is frequently mentioned.

The Earliest Formal and Official Document Issued By the Christian Church, Acts 15:23-29.—With the delegation a letter was sent, directed to "The Gentiles in Antioch, and Syria, and Cilicia." The churches founded by Paul on his first missionary tour are not mentioned, either because they were apparently unaffected as yet, or because the fewness of the Jews in those centers made it unnecessary to accentuate any restrictions.

The letter wholly repudiated the teaching of the Judaizers to whom the church at Jerusalem had given no commandment to declare that Gentiles must be circumcised, and keep the law. They did not have any authority at all from the apostles when they were thus troubling the church at Antioch with these words and so "subverting their souls." The word "subverting" literally means the entire removal of goods and chattels, to pack up baggage and carry off, to dismantle. It expresses with striking pictorial strength the idea that these false teachers were taking away from the Gentile converts their entire possession of Christ. As Paul says in Galatians 2:4, "They came in privily to spy out our liberty which we have in Christ Jesus, that they might bring us into bondage."

Judas and Silas, after exhorting the church, returned to Jerusalem. Paul and Barnabas remained at Antioch for some time, preaching and teaching the word of the Lord.

One machine now being used on Canadian farms can cut and thresh grain on 40 acres in a day with only two men operating it.

It restores energy spent on work or play and builds strong sturdy little bodies.

W. N. U. 1907

Saskatchewan's Cancer Campaign

Hon. Dr. Munroe Announces Opening Of Radium Emanation Plant and Cancer Clinics

Saskatchewan has the lowest death rate of Canadian provinces, and the lowest death rate from tuberculosis, cancer, diseases of the heart, pneumonia and automobile accidents.

These statements of fact are based on Canadian Vital Statistics for 1930, recently released by the Dominion Bureau of Statistics. They demonstrate, unequivocally, Saskatchewan's leadership in matters pertaining to the health of its people.

While several factors have contributed to the spectacular showing of Saskatchewan in statistical records giving the comparative death rates of the various provinces and the Dominion, one that should not be overlooked is the very effective contribution made by the Saskatchewan Department of Public Health, presided over by Hon. F. D. Munroe, M.D., as Minister. The province is noted for its advanced health legislation, and its achievements in the campaign against tuberculosis are too well-known to require citation. It was only to be expected, then, that when cancer started to claim particular attention as a "major killer," Saskatchewan should be the first province of Canada to tackle the disease as a public health problem.

The psychological opportunity came, in 1929, with an exceptionally favourable combination of circumstances. The medical profession had surveyed the cancer situation and been seized of the necessity of intensive efforts being made to combat the cancer scourge. But someone was required to crystallize the thoughts and ideas of the medical men into action. That person presented himself in Dr. Munroe who, having been elected to the Legislature as member for Moosomin, and appointed Minister of Public Health in September, 1929, immediately grasped the chance and formulated a policy which gained the support and endorsement of the entire medical profession of the province.

The campaign against cancer, then, first conceived in 1929, was presented in tangible and actionable form in the 1930 session of the Legislature when Dr. Munroe, in his first session as Minister of Public Health, piloted the Saskatchewan Cancer Commission Act through the Legislature and was voted a sum of \$115,000 for the purchase of radium and equipment. This year, a further sum of \$30,000 was voted him for administrative purposes.

Pursuant to the Act, a permanent Saskatchewan Cancer Commission was appointed, the members being Hon. Dr. Munroe, Dr. David Low, Regina, and Dr. R. O. Davison, Director of the Communicable Diseases Division of the Department of Public Health. Drs. Munroe and Low are graduates of McGill University, while Dr. Davison is a graduate of Toronto.

When the Commission settled to the gigantic task assigned to it, difficulties were experienced from the start in arranging for the supply of radium essential to the programme contemplated. During the interim between application for, and actual purchase of, a sufficient supply to start operations, contacts were established by which the Commission obtained

access to the latest data in cancer research, and definite plans for the provincial campaign were formulated to the end that no undue delay would follow receipt of the radium and institution of the actual, clinical programme.

So well were the plans laid that, immediately a supply of radium was obtained, Hon. Dr. Munroe was in position to announce that one of the first emanation plants west of Montreal had been established at the University of Saskatchewan to supply clinics in the main centres with radium gas in "seeds" and other suitable containers, for treatment of cancer cases. This emanation plant, it is stated, will not only produce sufficient seeds to meet provincial requirements, but will ultimately be the source of supply of provinces to the west.

The story of Saskatchewan's campaign is best told in the words of its author and sponsor, Hon. Dr. Munroe: "It was in June of last year, that I announced the personnel of the Saskatchewan Cancer Commission and, since their appointment, the members have been giving their attention to the various problems involved.

"It should be recognized that this Commission is not a temporary one, but a permanent body appointed to carry out the provisions of the Act, its functions including inquiry, education and treatment. We have been able to place an order for radium and are now in receipt of the first shipment which is in the form of radium bromide for use in the preparation of radon, or radium gas.

"In the outstanding clinics of the world, two methods of using radium in the treatment of cancer are considered valuable. One is the use of radium gas enclosed in suitable containers or applicators ("seeds"), and the other is the use of radium salt enclosed in needles and tubes made of platinum. In Saskatchewan, we propose that both methods will be used, either separately or combined, as deemed advisable. We also are making provision for the use of high voltage X-rays, both alone and in combination with surgical treatment and radium therapy.

"It is recognized that cancer cannot be dealt with in a manner that will produce satisfactory results, unless cases are available for treatment in the early stages of the disease. Consequently, with the co-operation of the medical profession, the Commission proposes to adopt an effective educational programme to facilitate early diagnosis and treatment. Consultative diagnostic clinics are being established in two centres, in connection with treatment clinics and also in connection with existing general hospitals. It is believed that more satisfactory results will be obtained by such procedure than by having separate institutions for cancer cases.

"In addition to this, the programme in Saskatchewan will follow the line approved and endorsed by the outstanding authorities on cancer treatment. That is to say, instead of following the very doubtful procedure of distributing radium supplies to physicians in all parts of the province upon requisition, the care of cancer patients will be confined to the established centres. This plan involves definite centralization of cancer treatment, and is based on the experience of other places which is, that cancer requires expert treatment and experienced care if adequate results are to be obtained.

"Cancer is, as a rule, a progressive condition, and the centralization of

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE: Captain Jimmy is flying to Japan with the Chinese General Lu. They run out of gasoline and are forced to land on a deserted island in the Chinese Sea.

After our adventure with the shark, we climbed up on the high rock that stood in the centre of the little deserted island. Here we lit a roaring big fire, in hope that some passing ship would see us.

All night we kept it blazing but morning broke grey and cold without a sign of smoke or sail on the horizon. After daylight, we piled on wet wood until a great pillar of white smoke went up to the clouds but never a sign of life did we see on the still, glassy ocean.

Great smooth swells came in from the open water, rose and crashed with a dull boom against the rocks but apart from the sound of the waves, our island seemed to be the most silent, deserted spot in the world. Sometimes we'd find ourselves whispering—why I don't know—for we could have shouted all day at the top of our voices and no one would have heard us.

Day after day we kept the smoke pillar rising into the sky—night after night we kindled a huge yellow blaze on the summit rock. We almost gave up hope of being rescued. No doubt we were far from the regular steamer channels.

When we weren't gathering wood for the fire, we were hunting eggs in the sand—and believe me—they were certainly terrible. We caught a few fish—but they were very small and felt like pin cushions, they were so full of bones. Being left on a desert island isn't half as much fun as we were taught to believe when we were boys.

On the fifth night a dense cold fog came in from the sea. It smelled like sea-weed and salt water and was so thick that you could scarcely see your

hand when you held it out straight. The branches dripped with moisture and we huddled close to the camp fire. Even General Lu shivered through his six suits of clothes. Scottie sneezed in disgust and hid himself in the wood pile.

Suddenly I woke up with a start. A deep rumbling sound drifted in from the sea. I grabbed Chung and shook him and he jumped to his feet with a yell. Then the deep rumbling sound came again. Once—twice.

A steamer horn! Sure enough. It was the deep-toned horn of a freighter. Frantically, we piled wood on the fire. I figured that some steamer was out there in the fog, not daring to move far until the air cleared.

Hour after hour, we fed the fire with armfuls of wood and brush. Up and down we tracked until we almost dropped from weariness. Lu forgot that he was a General and worked like a Trojan. If only the blaze could be made bright enough to penetrate the fog—

Then morning came again and a strong wind blew up from the East. Soon the air would clear. I paced impatiently up and down trying to peer through the thick white curtain of the fog.

Chung, to my surprise, lay down and prepared to go peacefully to sleep.

"Soon we know—very good—very good—no can tell," said the tranquil little Chinese. "Sleep always good—all men same when sleep. No much worry."

And with that he shut his eyes and snored loudly!

Meanwhile I stared out into the white fog, wondering what the next hour would bring.

NOTE—Any of our young readers writing to "Captain Jimmy," 2010 Star Building, Toronto, will receive his signed photo free.

cases will be of distinct value to the patients, permitting, as it does, periodic re-examination under expert attention, and prompt treatment of recurrences or metastases. Such a procedure also will be of definite value to us in carrying out provisions of the Act, by enabling us to follow up cases that receive treatment in order that complete and detailed statistical records may be compiled which, later, will serve as a guide in arriving at, and assessing the value of, the procedure used. This following-up of cases, with compilation of the data obtained, will be essential to providing the citizens of Saskatchewan with the most effective known treatment of the disease.

Referring to Saskatchewan's outstanding record as shown in comparative vital statistics, Hon. Dr. Munroe said:

"Saskatchewan is situated very favourably in comparison with other provinces of Canada and states of the American Union. Saskatchewan's death rate from cancer in 1928 was 55.2 per 100,000 population, whereas the other provinces and states recorded a rate in excess of 100. But those figures do not tell the whole story in this province. In 1905, the death

rate from cancer was only 8.8, whereas in 1919, it was 33.1 per 100,000. Thus it can be seen that cancer deaths are increasing at an alarming rate. In the ten-year period prior to 1928, the cancer deaths per 1,000 deaths from all causes in Saskatchewan, increased from 38.3 in 1919, to 76.2 in 1928. That means the rate has practically doubled in that period."

In conclusion, the Minister of Public Health said:

"Cancer is a disease of the adult and later life span. In Saskatchewan, the percentage of living persons over 40 years of age is smaller than in the older provinces. Consequently, the present appears to be the opportune time to begin operations against the cancer scourge, by making suitable preparations to provide the citizens of this province with the latest and most approved methods available of cancer treatment."

Country Cousin (in town)—Out in the country we have to treat the maids and other help like one of the family!

SASKATCHEWAN CANCER COMMISSION

HON. F. D. MUNROE, M.D., C.M., author and sponsor of the Saskatchewan Cancer Commission Act, a native of Glengarry County, Quebec, and a graduate of McGill University, was elected member of the Saskatchewan Legislature for Moosomin Constituency in the general elections of 1929. Appointed Minister of Public Health in September of that year, upon accession to office of the present Government, Hon. Dr. Munroe immediately applied himself to the cancer problem, his efforts resulting in passage of the Cancer Commission Act within the short space of five months. This, he admits, was made possible by the wholehearted support accorded him by members of the medical profession, irrespective of political affiliation. Hon. Dr. Munroe also inaugurated the Saskatchewan mental health programme.

DAVID LOW, M.D., C.M.

was born at Bainsford, Scotland, in 1868, and came to Canada in 1870. Educated in the public and high schools of Ontario, he graduated from McGill University in 1889, and for some time was house surgeon in Montreal general hospital. In 1890, he commenced practice in Regina and, from 1894 to 1901, was medical health officer for the city. Dr. Low was active in the establishment of the Regina Victoria Hospital and organized the Regina Medical Association. In 1913, he was elected president of the Saskatchewan Medical Association, and was chairman of the committee of the Canadian Medical Association which drafted the constitution upon which the Royal College of Physicians and Surgeons of Canada is founded.

R. O. DAVISON, M.D.

was born at Brantford, Ont., in 1885, and, receiving his early education in the public and high schools of his native city, later entered the University of Toronto from which he was graduated in 1908. Dr. Davison was appointed medical inspector in the Saskatchewan Department of Public Health in 1921 and, when the Division of Communicable Diseases was organized, in 1923, became its first director. When Hon. Dr. Munroe decided to institute a programme to deal with the cancer problem, Dr. Davison was placed in charge of the work as Director of Cancer Service. He has been active in medical circles since coming to Regina and, in 1920, was president of the Regina and District Medical Society.

LATE ESTIMATE OF THE WESTERN WHEAT CROP

Ottawa, Ont.—The wheat crop in the three prairie provinces is estimated at 246,400,000 bushels, in a crop report issued by the Dominion Bureau of Statistics. This is substantially below the crop of 374,500,000 bushels in 1930. While there are bumper crops in central Alberta, there is a complete failure in some southern regions of the prairie provinces. Higher wheat production is forecast in Alberta than in Saskatchewan, despite the fact that the seeded acreage in Alberta was only half that in the other province.

"If the provincial estimates are justified by the out-turn it will be the first time that Alberta has been the leading wheat-producing province," according to the report.

The total estimated yields of all the small grain crops, except fall wheat, are lower in 1931 than in 1930. In the maritime provinces, conditions and yields are very similar to 1930. In Quebec, production will be slightly lower. Wheat, rye and flaxseed production will be higher in Ontario, but the later sown oats and barley crops were reduced by summer drought. In British Columbia, yields are generally higher than in 1930. The grain harvest has proceeded under particularly favourable weather conditions, giving promise of high quality.

"The western wheatfields held very little reserve moisture at seeding time," the report says, "so that crop growth was dependent on the rains of the growing season. These were distinctly limited and late in a somewhat triangular area bordered on the east by Brandon, Manitoba, and on the west by Medicine Hat, Alberta, and attaining its greatest width in central Saskatchewan. The eastern and northern parts of Manitoba, most of northern Saskatchewan, and western, central and northern Alberta were favoured with greater precipitation, although this came too late to make really heavy crops in many districts.

"Threshing is about two weeks behind last year but, with excellent weather prevailing, has reached good proportions in southern regions and in the Peace River district. The quality of the crop promises to be high, although there will be shrunken kernels in the south and some starchiness in the regions of high yields. The market movement of the new crop is very tardy.

"Generally speaking, the wheat crop again proved its ability to withstand adverse drouth conditions better than the other small grains. The proportional reduction in wheat yield from 1930 is much less than in barley, rye and flaxseed, with the barley crop of 1931 estimated at less than half that of 1930, and the rye crop little more than one quarter."

Receives Grain Award

Wins Alberta Championship For Best Field Of Grain In Province

Red Deer, Alberta.—Alberta championship of 1931 for the best field of grain in the province has been awarded to James Hazlett, farmer of the Balmoral district. Hazlett, whose farm is a few miles from Red Deer, captured the southern Alberta crown and later his field was given top place in the whole province.

According to the judges Hazlett's field of Marquis wheat should yield 50 bushels per acre.

Tentative Date For Radio Hearing

Ottawa, Ont.—About December 10 is the tentative date for the hearing of the radio reference before the judicial committee of the Privy Council in England, according to latest official information received. The reference is on the question of the respective rights of the Dominion and the Provinces on radio broadcasting and receiving.

Saskatchewan Horses Win

Toronto, Ont.—George T. Fraser, of Tate, Sask., took prizes for the best mare any age, and best mare three-year-old and over in the Percheron judging at the Canadian National Exhibition.

W. N. U. 1907

To Assist Agriculture

Formation Of a National Agricultural Council Is Recommended

Regina, Sask.—The formation of a National Agriculture Council whose functions would include a thorough and continuous study of agricultural policy and the marketing possibilities in Canada and foreign countries, was approved by the agricultural committee of the Canadian Chamber of Commerce here.

The action of the agricultural committee followed a day devoted to a discussion on "what is a sound policy for Canadian agriculture."

Premier J. E. Brownlee, of Alberta, and a number of noted agricultural authorities all told of the difficulties confronting the farmer of today. Though none of the speakers attempted to define a cure for the situation all agreed that the agricultural situation demanded the fullest support of the business and industrial class.

Pleas for a lower rate of credit for farmers was made by Premier Brownlee. There was something in this direction needed if Canada was to avoid a far more serious situation, he said.

The feeding of lower class grain to cattle, to produce first class livestock and dairy products instead of the farmer accepting a mere recognition for his grain on the foreign market; a body to help the farmer market his products and a decrease in farm production, were suggested as means of helping Canadian farmers out of the present situation.

Free Transportation For Settlers' Effects

Alberta Government Extends Time Limit To November 30

Edmonton, Alberta.—Free transportation of settlers' effects in the case of farmers moving from the drought areas in the south to new locations in the north will be in effect until November 30, an extension of the time limit having been made by arrangement between the Provincial and Federal Governments and the free privilege applies to passengers as well as freight up to the end of September, but for the next two months to effects only.

Mexico Will Join League

Mexico City.—Mexico's acceptance of the invitation to join the League of Nations has been cabled to Geneva by Foreign Minister Gernaro Estrada. The proposal must also come before the senate for ratification inasmuch as membership in the league implies adherence to the covenant and the Treaty of Versailles.

Will Leave For France

Winnipeg, Man.—Chief of Police Chris. H. Newton, of Winnipeg's police force, has been appointed vice-president of the International Police Conference which is to be held in Paris, France, September 28. Word of his appointment was received from New York, and he will leave for the meeting within a few days.

HEADS LEGIONNAIRES

Major John S. Roper, who became President of the Canadian Legion of the British Empire Service League when Lieut.-Col LaFleche retired, was re-elected to the important post when members of the Legion from all parts of the Dominion gathered in Toronto.

Arctic Trip Ended

Wilkins Making Preparation For Early Return To America

Longyear City, Spitzbergen. — Sir Hubert Wilkins is overhauling and refuelling the submarine "Nautilus" in preparation for an early return to America, either direct or by way of Iceland.

The chief damage done on his cruise into the Arctic was the breaking of the mast by a violent storm. The radio apparatus also was harmed but repaired on the way back. The party expressed satisfaction with the working of its scientific instruments, especially the gyro-compass.

Members of the crew, bearded and dirty, but smiling, headed for steam baths on arrival. They said that during the southward trip from Spitzbergen the vessel rolled more than at any time since they left the United States, and that some of them were seasick.

Trans-Canada Telephone

System Expected To Be Completed By December 1

Edmonton, Alberta.—The trans-Canada telephone system is expected to be completed by December 1, according to Hon. V. W. Smith, Alberta Minister of Telephones, who returned recently from the Telephone Association of Canada meeting at Minaki, Ont. The Alberta link from Calgary east is finished and work on the western section from Calgary to the British Columbia boundary will be ended by the last of November, he said.

Will Use Canadian Fuel

Winnipeg, Man.—Use of Canadian fuel has been decided upon by the Winnipeg School Board. Orders for 55,000 tons have been placed, 45,000 tons from Alberta, and 10,000 tons from British Columbia mines.

Store Grain In North

Report States That Two Million Bushels Will Be Stored At Churchill This Winter

Churchill, Man.—More than 2,000,000 bushels of grain from the Canadian west will be stored at Churchill's new elevator this fall and winter to relieve the elevator facilities at the lakehead, and to prepare for shipments of grain over the bay route next spring, according to semi-official reports here. Definite decision on the project will be reached if the two ships taking part in the movement of grain from the bay this month reach their European ports successfully.

The project is finding much favour among officials of the Hudson Bay Railway because it means train crews and staffs would be kept on at work until well on into the winter instead of being laid off in a few weeks. As well as aiding in the movement of wheat in the west the plan would make a test of the bay elevator under the rigorous winter conditions of the Hudson Bay. Many claim the north climate will affect grain in storage here.

The most of the grain will come from the Saskatoon district but some of it will be from southern Saskatchewan, Moose Jaw, and Regina, if the Government decides in favour of the scheme.

Canada Favours Arbitration

Would Support Principle Minister Of Justice Tells League

Geneva, Switzerland. — Canada's support for the principle of "arbitration, security and disarmament" — the French formula—was announced to the assembly of the League of Nations by Hon. Hugh Guthrie, Canadian delegate, who is making his first appearance at Geneva. He is Canada's Minister of Justice.

This support, he said, would be in the nature of sympathetic co-operation in whatever plan may finally be agreed upon.

Canada is in no wise a militaristic nation and Canada's armaments are practically negligible, he said.

Suggest New Title

Capetown, South Africa.—"That the king's title be known in the Union of South Africa as George I. of South Africa and not George V. of Great Britain," is the resolution to be submitted to the Nationalist Party Congress by its Reitz branch, it was made known here. The branch holds this innovation justified on the ground South Africa obtained its independence in 1926."

Matter Of Federal Concern

Edmonton, Alberta.—Hon. George Hoadley, Minister of Health and Agriculture, had no comment to make on the report that 112 Hutterites were arriving in Alberta from South Dakota, except to state that it was a matter of Federal concern and the Hutterites, having satisfied Federal Immigration authorities, were now free to enter Alberta.

ANOTHER CIVIL WAR IN CHINA IS IN PROSPECT

Shanghai, China.—Only one month of peace has elapsed since the ill-timed rebellion of General Shih Yo-San was crushed in the north, but China is girding herself for another civil war. With the Cantonesse invasion of Hunan Province confirmed, Nanking, while repeatedly professing a desire for peace, is energetically preparing for conflict.

Meanwhile the national flood relief commission approved the \$70,000,000 Mexican (about \$21,000,000 gold) program of Finance Minister T. V. Soong for the relief of China's destitute millions.

The activities of Chiang Kai-Shek, president of the Nationalist regime and commander of its armies, indicate he is preparing to strike swiftly and with the most formidable weapons at his command in the hope of cracking the insurgent forces before they penetrate far into Hunan.

Military experts expressed the belief that the Hunan struggle would be swift and sanguinary, since the armies of both sides rank highest among all the Chinese in offensive qualities.

Will Continue Aid In West

United Church Of Canada Pledges Relief For Saskatchewan

Montreal, Que.—A new challenge to the Christian Church existed in the fact that "complete and extensive disaster had befallen the people of 40,000 square miles of southern Saskatchewan," Rev. William Munroe, D.D., secretary, declared in addressing members of the United Church of Canada, Montreal presidency, here.

The Presbytery appointed a special committee to aid the central body of the church in gathering and forwarding clothing and other relief material to the stricken community. It was emphatically stated that the church would stand behind its missionary work in Saskatchewan so that the ministry there would be fully maintained.

German Fleet Below Limit

Could Have Twice As Many Ships Under Versailles Treaty

Geneva, Switzerland. — Germany's arms statement showing an army of 100,500 men and 4,500 officers is published by the League of Nations secretariat.

Foreign Minister Julius Curtius in a foreword said that Germany had not yet been able to build her fleet up to the limit laid down in the Versailles treaty and that the report revealed "how meagre Germany's armament is compared with other states of corresponding territory and population."

"The navy possesses for example only four commissioned ships of the line, whereas according to Article 181 of the Versailles treaty and the regulations of the inter-allied marine control commission six ships of the line should be in service and two ships of the line in reserve, in other words twice as many."

State Hospitals

Hospitals Maintained By The State Visualized For The Future

Victoria, B.C.—Hospitals maintained by the state was a visualization of the future given by Hon. S. L. Howe, provincial secretary, at the opening of the fourteenth annual convention of the British Columbia Hospitals' Association.

"I am of the opinion that the time will come when the health of the people will be a state obligation," said Mr. Howe.

Boat Clears For Scotland

Port Arthur, Ont.—The freighter "Dewstone" of the Newfoundland-Halifax Transportation Company cleared from Port Arthur recently for Aberdeen, Scotland, with 1,600 tons of flour. This is the first boat this year to leave Port Arthur with a cargo direct for overseas. One boat left here for the Atlantic trip last year.

WHEN ENGLAND MET A CRISIS—AND WON

Here is a general view of the large crowd of Britishers which gathered in Downing Street, London, in which the Prime Minister has his official residence, to see what would develop following the downfall of the British Labour Government. When Ramsay MacDonald (right) left No. 10 Downing Street for Buckingham Palace, to confer with King George about the formation of the National Emergency Government, he was enthusiastically cheered by the great throng.

CURTAILING DUCK SHOOTING

The Hon. George Hoadley, speaking
before the Edmonton Rotary Club on
Thursday, expressed his determination
to prevent any shortening of the game
bird season in Alberta, and stated that
a new game act would be before the
legislature by next session. He stressed
the point that in Alberta, where the
ducks were bred and fed, only 200,000
birds a season were killed, while in
the United States 30,000,000 were slaugh-
tered annually.

Alberta sportsmen, and all those who
wish to see fair play, will agree em-
phatically with Mr. Hoadley's stand.
For Canada, the major breeder, to cur-
tail her sport merely for the benefit
of the United States would be em-
phatically unfair.

Yet, refusal by Canada to curtail
her shooting will not solve the prob-
lem of a rapidly depleting supply of
game birds. Something must be done
and it must be done to the south of
the boundary. It is in the interests of
United States sportsmen themselves
that shooting activities in that country
be curtailed.—Calgary Albertan.

**THE STANDING STILL
TYPE OF CITIZEN**

There is a standpatter type of mind
that thinks the world will not alter in
the least following the present depres-
sion. It is just the same mind that is
horrified at the very suggestion that
anything good can come out of Russia
—Russian ideals, they argue, emanate
from the Reds and consequently must
be wrong. The world would never move
ahead if the standpatter was in control.

Movements like that in Russia, after
close study by a man such as Marquis
of Lothian, are considered to possess
features worthy of imitation, and he
says that it may not be long before
Great Britain is putting into practice
some of the Russian experiments, but
in a constitutional manner and not by
revolution. Raising alarms about Reds
and Red propaganda may stir up hos-

tility, but we must not overlook that
one of the greatest experiments in
world history is being attempted in
Russia, and all the students of econo-
mics and sociology are watching close-
ly.

Forgetting Russia altogether, is the
world we expect, as does the standpat-
ter, that we are to go through a de-
pression of two or three years, and
come out of it without a change in
the present system? Is unemployment
with all its distress to be continually
present in the world? Are we to go
through the pains and aches of eco-
nomic distress and not to learn some
lessons that will enable us to avoid
them in future? It will be a sorry day
for the world if we don't move ahead
and rid ourselves of palpable weak-
nesses in the present system. If the
standpatter attitude dominates at the
end of it all, then it means that the
world and its people cannot look ahead
with any hope that the conditions we
have faced and struggled to overcome
will not return to us again.

But the world always moves forward,
not very noticeably sometimes but a
bit ahead nevertheless. Factory legis-
lation proposed after an experience in
modern industrialism was frowned upon
and stubbornly opposed, but it came
and the standpatter of today is ac-
cepting such laws, though the stand-
patter of half a century and a quarter
century ago combatted them as an in-
fringement upon the rights of capital.
And so it has been with the work-
men's compensation, oldage pensions,
the franchise for women and every-
thing in fact that has meant a step
forward. The standpatter has called
"halt", but the forces of progress have
moved ahead—and in scores of instan-
ces we are accepting a permanency
and as a necessity what the earlier
standpatter termed revolutionary and
socialistic.—Lethbridge Herald.

IF EVERYBODY PAID THEIR BILLS

The farmer sells a load of wheat
And all the world grows fair and sweet
He hums a couple of cheerful tunes
And pays the grocer for his prunes.
The grocer who has had the blues
Now buys his wife a pair of shoes.
That ten the shoeman thinks God-sent
And runs and pays it on the rent.
Next day the rent man hands the bill
To Dr. Carver for a pill.
And Dr. Carver tells his frau
That business is improving now.
And cheers her up and says, "My dear
You've been quite feeble for a year,
I'm thinking you should have a rest
You'd better take a trip out west."
And in a couple of days his frau
Is on the farm of Joshua Howe.
She pays her board to Farmer Howe.
Who takes the bill and says, "I swear,
Here's something that can't be beat,
This is the bill I got for wheat!"
He hums a couple of cheerful tunes
And goes and buys a lot more prunes.

SAGO TEHONIATARAKAKOWA!

"Greetings, Chief Swiftest Rider
Of Mighty Waters."

Honours have been heaped upon Captain R. G. "Jock" Latta, commander of the trans-Atlantic record liner Empress of Britain since his new 42,500 vessel regained the Blue Ribbon of the Atlantic for the British Empire by all classes of people but none have been more sincerely offered than the recent tribute of the Six Nations Indians.

Encamped at Loretteville, Quebec, where they are establishing a village in which the ancient arts of the redman are practiced, members of the Six Nations under the leadership of 81 year old Chief Wolverine recently honoured the Canadian Pacific Commodore by adopting him into the tribes and conferring chieftainship upon him as a tribute

to his feats of seamanship with the big white "war-canoe." Meeting the Empress of Britain in their gaily decorated birch-bark canoes a score of braves and Squaws, led by Wolverine, Running Bull, American Horse and Princess White Eagle, danced their ceremonial dance on the Games Deck of the mighty liner, stood in reverent silence while the old Chief invoked the great spirits and rent the air with their whoops as Princess White Eagle and Chief Wolverine crowned the new chief with a war bonnet of eagle's feathers.

Photos show (left) Chiefs and braves in their canoes cluster round the big ship as she arrives, (right) The final ceremony, and the deer skin certificate of adoption.

ENO'S "FRUIT SALT"

To Feel Your Best

Take a dash of ENO'S "Fruit Salt" in a glass of water every morning. Millions do this daily because they know that ENO—gentle, effective, non-habit-forming—is the deadly foe of constipation.

In cases of acid stomach, fatigue, biliousness—ENO is invaluable. For more than sixty years it has been the standby in thousands of well-regulated homes.

But remember, only ENO can give ENO results.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET PEDLER

Author of
"The Splendid Folly," "The Hermit
Of Far End,"
Hodder & Stoughton, Ltd., London.

It's a strange road leads to the House of Dreams,
To the House of Dreams-Come-True,
Its hills are steep and its valleys deep,
And salt with tears the Wayfarers weep,
The Wayfarers—I and you.
But there's sure a way to the House of Dreams,
To the House of Dreams-Come-True,
We shall find it yet, ere the sun has set,
If we fare straight on, come fine, come wet,
Wayfarers—I and you.
—Margaret Pedler.

CHAPTER I. The Wander-Fever

The great spaces of the hall seemed to slope away into impenetrable gloom; velvet darkness deepening imperceptibly into sable density of panelled wall; huge, smoke-blackened beams, stretching wide arms across the roof, showing only as a dim lattice-work of ebony, fretting the shadowy twilight overhead.

At the furthest end, like a giant, golden eye winking sleepily through the dark, smouldered a fire of logs, and near this, in the luminous circle of its warmth, a man and woman were seated at a table lit by tall wax candles in branched candlesticks. With its twinkling points of light, and the fire's red glow quivering across its shining surface, the table gleamed out like a jewel in a sombre setting—a vivid splash of light in the grey immensity of dusk-enfolded hall.

Dinner was evidently just over, for the candlelight shone softly on satin-skinned fruit, while wonderful gold-veined glass flecked the dark pool of polished mahogany with delicate lines and ripples of opalescent colour.

A silence had fallen on the two who had been dining. They had been gay enough together throughout the course of the meal, but, now that the servants had brought coffee and withdrawn, it seemed as though the stillness—that queer, ghostly, memory-haunted stillness which lurks in the dim, disused recesses of a place—had crept out from the four corners of the

hall and were stealing upon them, little by little, as the tide encroaches on the shore, till it had lapped them around in a curious atmosphere of oppression.

The woman acknowledged it by a twist of her slim shoulders. She was quite young—not more than twenty—and as she glanced half-enquiringly at the man seated opposite her there was sufficiency of likeness between the two to warrant the assumption that they were father and daughter. In each there was the same intelligent, wide brow, the same straight nose with sensitively cut nostrils—though a smaller and daintier affair in the feminine edition, and barred across the top by a little string of golden freckles—and, above all, the same determined, pointed chin with the contradictory cleft in it that charmed away its obstinacy.

But here the likeness ended. It was from someone other than the dark-browed man with his dreaming, poet's eye—which were neither purple nor grey, but a mixture of the two—that Jean Peterson had inherited her beech-leaf brown hair, tinged with warm red where the light glinted on it, and her vivid hazel eyes—eyes that were sometimes clear and still and brown like the waters of some quiet pool cradled among the rocks of a moorland stream.

They were like that now—clear and wide-open, with a certain pensive, half-humorous questioning in them. "Well?" she said, at last breaking the long silence. "What is it?"

The man looked across at her, smiling a little. "Why should it be—anything?" he demanded.

She laughed amusedly. "Oh, Glyn, dear!"—she never made use of the conventional address of "father." Glyn Peterson would have disliked it intensely if she had—"Oh, Glyn dear, I haven't been your daughter for the last twenty years without learning to divine when you are cudgelling your brains as to the prettiest method of introducing a disagreeable topic."

Peterson grinned a little. He tossed the end of his cigarette into the fire and lit a fresh one before replying.

"On this occasion," he observed at last, slowly, "the topic is not necessarily a disagreeable one. Jean"—his quizzical glance raked her face suddenly—"how would you like to go to England?"

"To England?" Her tone held the same incredulous excitement that anyone unexpectedly invited to week-end at El Dorado might be expected to evince.

"England! Glyn, do you really mean to take me there at last?"

"You'd like to go then?" A keen observer might have noticed a shade of relief pass over Peterson's face.

"Like it? It's the one thing above all others that I've longed for. It seems so ridiculous to be an Englishwoman and yet never once to have set foot in England."

The man's eyes clouded. "You're not—entirely—English," he said in a low voice.

Jean knew from what memory the quick correction sprang. Her mother, the beautiful opera singer who had been the one romance of Glyn Peterson's life, had been of French extraction.

"I know," she returned soberly. "Yet I think I'm mostly conscious of being English. I believe it's just the very fact that I know Paris—Rome—Vienna—so well, and nothing at all

THE HOUSE OF DREAMS - COME - TRUE

BY MARGARET PEDLER

A THRILLING NEW SERIAL

From the great castle of Beirnfels, the House-of-Dreams-Come-True, into a world of bitterness and strife and love, went Jean Peterson. Thrilled by a magic day at Montavan, spent with a man of mystery, she was brought face to face with the realization that she loved him—hopelessly.

Tragedy, misery, vengeance dogged at the heels of this beautiful love-child the moment she set foot on the shores of England. Disillusioned, broken-hearted, she returned to her castle of shattered Dreams only in time to see it, too, come tumbling down before her eyes, swept by the ravages of fire. But in its place there rose a greater, a more enduring castle—the castle of love—the House-of-Dreams-Come-True.

about England, that makes me feel more absolutely English than anything else."

A spark of amusement lit itself in Peterson's eyes.

"How truly feminine!" he commented drily.

Jean nodded.

"I'm afraid it's rather illogical of me."

Her father blew a thin stream of smoke into the air.

"Thank God for it!" he replied lightly. "It's the cursed contradictoriness of your sex that makes it so enchanting. If women were logical they would be as obvious and boring as the average man."

He relapsed into a dreaming silence. Jean broke it rather hesitatingly.

"You've never suggested taking me to England before."

His face darkened suddenly. It was an extraordinarily expressive face—expressive as a child's, reflecting every shade of his constant changes of mood.

"There's no sense of adventure about England," he said shortly. "It's a dull corner of the world—bristling with the proprieties."

Jean realised how very completely, from his own point of view, he had answered her. Romance, beauty, the sheer delight of utter freedom from the conventions were as the breath of his nostrils to Glyn Peterson.

Born to the purple, as it were, of an old English county family, he had stifled in the conventional atmosphere of his upbringing. There had been moments of wild rebellion, bitter outburst against the established order of things, but these had been sedulously checked and discouraged by his father, a man of iron will, who took himself and his position intensely seriously.

Ultimately, Glyn had come to accept with more or less philosophy the fact of his heirship to old estates and old traditions, with their inevitable responsibilities and claims, and he was just preparing to fulfil his parents' wishes by marrying, suitably and conventionally, when Jacqueline Mavory, the beautiful half-French opera singer, had flashed into his horizon.

In a moment the world was transformed. Artist soul called to artist soul; the romantic vein in the man, so long checked and thwarted, suddenly asserted itself irresistibly, and the very day before that appointed for his wedding, he and Jacqueline ran away together in search of happiness.

And they had found it. The "County" had been shocked; Glyn's

Cursed from early childhood with an almost uncontrollable temper, and branded in later life by "The Mark of the Beast," Blaise Tormarin committed a crime for which he seemed destined to pay a life-long penalty of mental anguish. But that magic day at Montavan opened for him a new life—a life through which he fought a losing battle against love.

And losing, he yielded to the love of the beautiful girl from the far-off castle, only to find as the wedding day approached, that tragedy still followed, making it impossible for him to marry. Here "Chance," in the person of revenge, stepped in and the world cleared of misery and darkness; and Blaise and Jean found at last their House-of-Dreams-Come-True.

father, unbending descendant of the old Scottish Covenanters, his whole creed outraged, had broken under the blow; but the runaway lovers had found what they sought.

At Beirnfels, a beautiful old schloss on the eastern border of Austria, remote from the world and surrounded by forest-clad hills, Glyn Peterson and Jacqueline had lived a romantically happy existence, roaming the world whenever the wander-fever seized them, but always returning to Schloss Beirnfels, where Peterson had contrived a background of almost exotic richness for the adored woman who had flung her career to the winds in order to become his wife.

(To Be Continued.)

Crude weighing machines based on the balance were used in Egypt at least 5,000 years before the Christian Era.

Little Helps For This Week

"Changed into the same image from glory to glory."—2 Corinthians iii. 18.

As one lamp lights another, nor grows less,
So nobleness enkindleth nobleness."
—James Russell Lowell.

In a very simple and literal way he believed that God was His Father, not in name only, but in very truth. He knew that he, in common with every human being, had it in his power to live as a son or as an alien; and he knew—by that most sure proof, the experience of daily life—that he could only overcome the cravings of selfishness by a constant effort to come into closer union with the life-giving spirit to whom he was truly akin, that so he might not starve, but grow and develop.—Knight-Errant.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Eclectic Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Alberta Homesteads

Homestead entries in Alberta for the month of July numbered 1,114, more than half of which were taken out through the Edmonton land office. Of the total for the month, 331 entries were made by women, this being the first occasion in which the new law enabling women to homestead has been in operation.

Cross to the Old Country for CHRISTMAS

That trip you've decided to take next year, or even the year after, can be a reality this Christmas. The money you have set aside is enough now! The fare on the fast Canadian Pacific palace-ships is radically reduced but accommodation and meals are of the same quality that has made Canadian Pacific famous the world over.

Cost of living in the Old Country is less than it was.

Ships sail regularly and frequently during October and November.

Commencing in this issue of The Chronicle is a new serial story, "The House of Dreams-Come-True" by Margaret Pedler. Don't forget to read the first and future installments.

The Rev. L. D. Batchelor is in Calgary this week and will preach at St. John's Church next Sunday, morning and evening.

The Carbon Lawn Tennis Club Juniors were visitors to Drumheller on September 13th and played the return match with the Drumheller South Side Juniors. Thirteen events were played and the result was a win for the Carbon juniors by eight events to five. Carbon had won the first match here last June by nine events to four. Owing to lack of space we are forced to omit the results and scores of these games.

Rev. Wm. McNichol, L. Poxon and E. J. Rouleau were duck hunters near Elnora on Tuesday and were quite successful in their venture. The party got about 40 ducks.

—A silver tea in aid of the Anglican Church will be held at the home of Mrs. Braisher on Saturday, September 26th, from 4 p.m. to 6 p.m. and from 7 p.m. to 10 p.m. Men and ladies welcome.

S. N. Wright and J. Atkinson are in Calgary this week attending the Exchequer Court as witnesses for the Soldier Settlers of the Pope Lease in the land revaluation cases.

Mr. and Mrs. Fairbairn motored to Calgary on Tuesday to take Jimmy to the Mount Royal College, where he will take his grade 12.

H. M. McNaughton was a Calgary visitor last week.

Mr. and Mrs. S. F. Torrance, Archie McLeod and Gordon Cadman motored to Calgary on Monday and returned Tuesday.

FOR SALE—A1 Milk Cow. Just fresh. Apply to Jas. Smith, Carbon.

Mrs. L.B. Hart and Johnson motored to Calgary last Saturday.

I. Guttman returned Sunday after spending a few days in Calgary.

Mr. McLean, school inspector, was in Carbon last Thursday and acted as judge at the school fair.

Miss Lucy Ruff returned to Carbon on Sunday, after a two months holiday.

of Alberta, says:—

"Looking to the future I am confident that Alberta farmers will never be satisfied by any system of marketing that is not strictly co-operative in its basis, because no other system can meet their needs."

"By patronizing Pool elevators we can speed the day when the co-operative system will be firmly established as the normal method of handling our products."
